# Choate Represents Denali Growth Partners in \$65M Growth Investment in Tobin Scientific

Choate represented Denali Growth Partners as a co-lead in the \$65M growth investment into Tobin Scientific, a leading provider of cGMP storage, biorepository services, and specialized logistics for the life sciences industry. Tobin Scientific is widely recognized for its white-glove approach to biopharma logistics, including cold chain transport, compliant storage solutions, and end-to-end project execution for laboratories, manufacturing sites, and biorepositories across the U.S. The funding will be used to expand Tobin Scientific's cGMP-compliant storage and logistics capacity, broaden its geographic footprint in key pharmaceutical hubs, and support targeted M&A initiatives across the broader life sciences supply chain. Denali Growth Partners co-lead the round with Truck 9 Partners.
