Choate represented New Heritage Capital in its partnership with and investment in Carepoint Pharmacy, an end-to-end access hub and dispensing pharmacy serving patients nationwide. The investment was structured using Heritage's Private IPO[®] solution, which leaves operating control in the hands of current Carepoint management while providing the financial flexibility to accelerate future growth. Carepoint is the first platform that combines 50-state pharmacy dispensing with comprehensive support services for pharmaceuticals that can otherwise be difficult for patients to obtain.
