Choate represented Treville Capital Group, a multi-billion-dollar alternative asset manager, as it led a \$355M strategic growth financing in Platform Accounting Group, a leading operator and acquirer of boutique accounting and advisory firms across the United States, serving more than 50,000 clients through a network of regional offices and specialized advisory practices. The financing included participation from other institutional investors including Vista Credit Partners, Siguler Guff, Aquiline, Brightwood Capital Advisors, and existing investor The Cynosure Group. This latest investment provides Platform Accounting Group with additional capital to accelerate its acquisition strategy, expand its service offerings, and invest in technology and talent across its platform in a rapidly evolving industry.
