GHO Capital to Acquire FotoFinder Systems

Choate represented GHO Capital, the European specialist investor in global healthcare, as U.S. counsel in its agreement to acquire a majority holding in FotoFinder Systems from current majority owner EMZ Partners. FotoFinder is the global market leader in analogue & digital dermatoscopes, total body photography systems, and diagnostic software & AI for skin cancer detection and dermatology.

The acquisition expands GHO Capital's portfolio of MedTech companies innovating in high growth therapeutic areas and GHO's experience in scaling international healthcare platforms will support the FotoFinder in unlocking its next phase of growth. Alongside GHO's equity commitment, EMZ Partners and management will reinvest to hold a minority position.
