Marta Garcia represents leading technology and life sciences companies in complex patent and intellectual property disputes. She focuses her practice on high-stakes patent litigation and related proceedings, drawing on a technical background in materials science and biomedical engineering to advise clients across the chemical, mechanical, and biotechnology sectors.

Marta has extensive experience managing all phases of litigation, from pre-suit analysis through trial and appeal. She plays a leading role in case strategy and execution, including briefing dispositive motions, overseeing fact and expert discovery, and preparing expert witnesses for deposition and trial. Marta also represents clients in administrative proceedings before the U.S. Patent and Trademark Office, including *inter partes* review matters.

In addition to her litigation practice, Marta advises clients on patent strategy, diligence, and risk assessment. She conducts patentability and non-infringement analyses, prepares written opinions, and works closely with inventors to develop prosecution strategies aligned with business objectives.
